### Standard Control Panel -EPmaster EPM7

Protection, distribution, and automatic control panel, which starts the generator set when it detects a mains failure and stops it when the mains is restored with the control unit EPM7. It also starts and stops the group manually via a pushbutton or remote start-up by contact.

It has the following:

- Emergency stop push button
- Protections:
  - Circuit breaker (preheating resist.) 2P (16 A)
  - Protection fuses for control module
- Voltage & speed trimmers
- Battery charger
- DC switch
- Working Lamp switch
- Distribution: Direct output of the circuit breaker
- EPM7 control and protection centre;

## EPmaster EPM7

It has a digital LCD screen, which provides easy reading of the information regarding the Engine, Alternator, Mains and Charging. The controller meets all requirements for Auto Mains Failure (AMF) applications including remote communication and internet control, user configuration and complete genset monitoring and protection.
